

FOR IMMEDIATE RELEASE

Regional Medical Imaging Adds Dr. Gerasymchuk to Team

FLINT, MICH. (May 1, 2020) – Regional Medical Imaging (RMI) is pleased to add Grygori (Greg) Gerasymchuk, M.D., to its roster of highly specialist radiologists. He joins 16 other radiologists at RMI’s nine office outpatient medical imaging business.

Dr. Gerasymchuk, of Oakland Township, worked from 2009 to 2020 at Eastpointe Radiologists P.C. in Clinton Township before coming to RMI. While there, he also served as program director for diagnostic radiology at St. Joseph Mercy Oakland Hospital in Pontiac and served as a clinical instructor in radiology at Ross University School of Medicine. He is involved with or leads various imaging programs, advisory boards, and other radiological professional groups.

Specializing in Magnetic Resonance Imaging (MRI) of the body with an emphasis on oncology, he was instrumental in using MRI imaging to help reduce the number of needle insertions required for prostate cancer biopsies, and has been involved in numerous other research endeavors.

His training includes a fellowship in body imaging at William Beaumont Hospital of Royal Oak, radiology residency at St. Joseph Mercy Oakland Hospital, and an internship at William Beaumont Hospital.

Prior to this, he worked in state hospital settings in Ukraine, receiving his M.D. at Ternopil State Medical Academy followed by a residency, fellowship in gastroenterology, and work as a staff gastroenterologist prior to coming to the United States. Dr. Gerasymchuk is licensed in the states of Michigan and Florida, and is certified by the American Board of Radiology.

His combined experience in clinical gastroenterology work and diagnostic radiology with an oncology emphasis will further enhance RMI’s already significant clinical expertise.

Dr. Gerasymchuk said he is excited to join the RMI team, seeing outpatient radiology as being “on the frontier of developing radiology.” He also appreciates that RMI provides more focused, rapid patient imaging at a lower cost with shorter transportation times thanks to its 10 offices.
