

Dear Patients,

At Regional Medical Imaging, our healthcare team along with **you and your family's health and well-being** continue to be our top priority. This is why we remain focused in our efforts to provide the highest quality and [safest care](#) to all who enter our facilities.

As a healthcare facility, we are eager to do our part to prevent a surge, especially now that we are seeing a rise in cases.

Masks will continue to be required in all Regional Medical Imaging facilities.

We are standing firmly by the policies we have in place. These include mandatory social distancing and mask wearing for team members and patients at all of our facilities. We are equally committed to the enforcement of those policies as long as they are in place. The steps we've taken have been scientifically proven to protect you, your family and our staff from contracting COVID-19 and to slow the spread of the disease that has affected so many lives.

You likely have heard in the news the recent decision by the Michigan Supreme Court to strike down Gov. Gretchen Whitmer's emergency orders, raising questions about the state mandates. Michigan Department of Health and Human Services answered with its own ruling by issuing those same regulations restricting large gatherings, requiring masks in public spaces and limiting the number of employees and customers in workplaces and businesses.

We acknowledge that there have been conflicting political and legal opinions regarding safety measures to follow at this point in the COVID-19 pandemic. But those opinions do not relate to the scientific evidence supporting the safety policies we are enforcing to protect our community.

We remain strongly committed to be a safe, trusted partner in your health.

Stay safe,

Randy D. Hicks, M.D., M.B.A.
Chief Executive Order
Regional Medical Imaging
