PRESS RELEASE

RMI brings advanced imaging technology to Flint

Flint, Mich – Dec. 9, 2022 – Regional Medical Imaging (RMI) is excited to announce the installation of new Magnetic Resonance (MR) scanning technology at its Lennon Road facility. The new scanner combines the latest advancements in MR with the sophisticated engineering of a 1.5T wide-bore system. It provides a significantly advanced level of patient comfort with unique applications designed to minimize scan times and improve image quality.

The installation of this technology is yet another example RMI's commitment to providing patients with the latest in diagnostic imaging technology.

This new scanner, the SIGNA™ Voyager from GE Healthcare, is built with contemporary architecture that delivers deeper signal penetration and sharper, high-quality images. The intelligent design automates patient protocols to help decrease exam times and accommodate more patients per day. The SIGNA™ Voyager comes equipped with the SIGNA™Works productivity platform designed to maximize clinical performance and simplify operational efficiency.

“We have long been an innovator and medical imaging leader in Michigan” says Carrie Berlin, Chief Operations Officer for RMI. “Bringing the technology of the SIGNA™ Voyager to this region is yet another way we are helping to improve efficiency and accuracy in medical diagnosis while, perhaps more importantly, improving the lives of those we serve.”

###

About RMI

Regional Medical Imaging (RMI) is Michigan's largest outpatient imaging organization with two centers in Flint, and centers in Fenton, Grand Blanc, Davison, Lapeer, Novi, Royal Oak and Southgate. Founded in 1985, RMI is committed to personal attention and respect for patients in a convenient, clean, comfortable setting. The motto “Our family taking care of your family” is the core philosophy of RMI. The company, nationally recognized for excellence, strives to lead and innovate in the field of diagnostic and interventional radiology. To learn more about this unique company visit www.rmipc.net.
