Regional Medical Imaging CEO & Owner Achieves Fellow Status

Flint, Mich. – One of the highest honors the American College of Radiology (ACR) can bestow on a member in good standing is recognition as a Fellow of the American College of Radiology (FACR). Regional Medical Imaging CEO & Owner, Dr. Randy Hicks, was recently recognized with this prestigious credential.

ACR annually awards this distinction to a very select group of applicants. In fact, throughout the United States, only 15 percent of eligible diagnostic radiologists, interventional radiologists, radiation oncologists and medical physicists achieve FACR status.

In Michigan, of the 894 diagnostic radiologists, interventional radiologists, radiation oncologists and medical physicists only 129 (14 percent) have received their fellowship.

“I am honored to have been awarded this degree in recognition of my accomplishments in service to the American College of Radiology,” Dr. Hicks says. “I have served on the board of directors of the Michigan Radiological Society for many years, and currently I serve as Co-Chair for the finance committee. At a national level, I have served both as alternate councilor and councilor. I thank my colleagues for this recognition.”
